

# Unifusor Classic

Unifusor Classic is available with a traditional thumbwheel type air control valve or with a leakproof stopcock.

## Frequent areas of Applications:

- SURGERY
- INTENSIVE CARE
- RADIOLOGY, SPECIAL PROCEDURES
- CARDIAC CATHERIZATION LABORATORY
- EMERGENCY / TRAUMA DEPARTMENT
- LABOR & DELIVERY
- ONE DAY SURGERY
- PRE-OPERATIVE CARE
- POST OPERATIVE CARE

**GAUGE @ zero**  
Standard starting position.  
Shows normal, unpressurized fluid reading.

**GAUGE @ 300mmHg:**  
Indicates standard use pressure for rapid fluid delivery.

**GAUGE @ red line**  
Bleed valve prevents overpressurization of fluid bags.

**STOPCOCK**  
Large bore, 4 way leakproof stopcock

**THUMBWHEEL**  
Rotates easily from opened and closed positions. One hand inflation/deflation
