- Multipurpose
- Latex-free
- MDD 93/42 EEC
CE mark certified

Unifusor Classic is designed for use in rapid fluid infusion, invasive pressure monitoring, and autotransfusion procedures. Unifusor Classic is made from hospital-white nylon material that provides the most durable quality, delivers the maximum pressure and assures cleanliness. Sterile parenteral fluid and blood levels are easily viewed through the clear sleeve material which provides a fluid shield in the case of a ruptured bag.

Statcorp

- convenient IV pole loop
